- **iComfort® S30 Ultra-Smart Wi-Fi Communicating Thermostat**

* iComfort® S30 Ultra-Smart Wi-Fi Communicating Thermostat required. Not furnished - Order separately.
FEATURE HIGHLIGHTS

1. Variable-Speed Outdoor Coil Fan Motor With Integrated Control
2. Copper Tube/Enhanced Fin Coil
3. Low Pressure Switch
4. High Capacity Liquid Line Drier
5. Variable Capacity Scroll Compressor
6. DC Inverter Control
7. iComfort® Communicating Control
8. Heavy Gauge Steel Cabinet
9. SmartHinge™ Louvered Coil Protection
10. Refrigerant Line Connections and Access

NOTE - XC20 MODELS CAN ONLY BE MATCHED WITH iCOMFORT®-ENABLED VARIABLE-SPEED INDOOR FURNACES AND AIR HANDLERS.
NOTE - XC20 MODELS CAN ONLY BE USED WITH AN iCOMFORT® COMMUNICATING THERMOSTAT.

APPLICATIONS
- 2 through 5 ton
- Sound levels as low as 65 dBA
- Single phase power supply
- Applicable to indoor air handlers or gas furnaces with indoor add-on coils
- Shipped completely factory assembled, piped and wired

NOTE - The XC20 can only be matched with iComfort®-enabled variable-speed indoor furnaces and air handlers.

REFRIGERATION SYSTEM
- 2 Copper Tube/Enhanced Fin Coil
  • Lennox designed and fabricated coil
  • Ripple-edged aluminum fins
  • Copper tube construction
  • Lanced fins for maximum fin surface exposure
  • Flared shoulder tubing connections
  • Silver soldering construction
  • Factory tested under high pressure
  • Entire coil is accessible for cleaning

- 3 Low Pressure Switch
  • Shuts off unit if suction pressure falls below setting
  • Provides loss of charge and freeze-up protection
  • Automatic reset

- 4 Hi-Capacity Liquid Line Drier
  • Factory installed in the liquid line, the drier traps moisture or dirt that could contaminate the refrigerant system
  • 100% molecular-sieve bead type drier

NOTE - Refer to Lennox Equipment Limited Warranty certificate included with unit for specific details.

FEATURES

APPROVALS
- AHRI Standard 210/240 certified
- AHRI Certified system match-ups and expanded ratings, visit www.LennoxPros.com
- ENERGY STAR® Certified (certain units)
- Sound rated to AHRI Standard 270-2008 test conditions
- Tested in Lennox’ Research Laboratory environmental test room
- Rated According to U.S. Department of Energy (DOE) test procedures
- Region specific models meet the minimum efficiency requirements for U.S DOE Federal Regional Standards in that area
- Unit and components ETL, NEC and CEC bonded for grounding to meet safety standards for servicing
- ETL certified (U.S. and Canada)
- ISO 9001 Registered Manufacturing Quality System

WARRANTY
- Compressor:
  • Limited ten years in residential installations
  • Limited five years in non-residential installations
- All other covered components:
  • Limited five years in residential installations
  • Limited one year in non-residential installations

NOTE - Refer to Lennox Equipment Limited Warranty certificate included with unit for specific details.
REFRIGERATION SYSTEM (continued)

Optional Accessories

Expansion Valve Kits
• Field installed on certain indoor units
• See TXV Usage table
• Chatleff style fitting

Freezestat
• Senses suction line temperature
• Cycles compressor off when suction line temperature falls below it’s setpoint
• Opens at 29°F and closes at 58°F
• Installs on or near the discharge line of the evaporator or on the suction line

Refrigerant Line Kits
• Refrigerant lines are shipped refrigeration clean
• Lines are cleaned, dried, pressurized and sealed at factory
• Suction line fully insulated
• Lines are stubbed at both ends

NOTE - Not available for -060 models. Must be field fabricated.

NOTE - The XC20 is a variable capacity air conditioner utilizing variable speed compressor technology. With the variable speed compressor and variable pumping capacity, additional consideration must be given to refrigerant piping sizing and application. Please refer to the Installation Instructions for Line Set Requirements and Refrigerant Piping Guidelines.

PRECISE COMFORT® TECHNOLOGY

The Variable Capacity Compressor and DC Inverter Control is an integrated system that operates together to reduce overall energy usage when compared to conventional air conditioners.

Variable Capacity Scroll Compressor
• Operates on a variable frequency determined by the DC Inverter Control to vary capacity based on the cooling load required
• High volumetric efficiency
• Uniform suction flow
• Constant discharge flow
• Quiet operation

Compressor Operation
• Two involute spiral scrolls matched together generate a series of crescent shaped gas pockets between them
• During compression, one scroll remains stationary while the other scroll orbits around it
• Gas is drawn into the outer pocket, the pocket is sealed as the scroll rotates
• As the spiral movement continues, gas pockets are pushed to the center of the scrolls
• Volume between the pockets is simultaneously reduced
• When the pocket reaches the center, gas is now at high pressure and is forced out of a port located in the center of the fixed scrolls
• During compression, several pockets are compressed simultaneously resulting in a smooth continuous compression cycle
• Continuous flank contact, maintained by centrifugal force, minimizes gas leakage and maximizes efficiency
• Compressor is tolerant to the effects of slugging and contaminants

Top Cap Thermal Sensor Switch
• Located on top of the compressor casing
• Discontinues compressor operation in case of abnormal operating conditions

Compressor Sound Dampening System
• A polyethylene compressor cover containing a 2 inch thick batt of fiberglass insulation for better sound dampening
• All open edges are sealed with a one-inch wide hook and loop fastening tape

Crankcase Heater
• Crankcase heater prevents migration of liquid refrigerant into compressor and ensures proper compressor lubrication
DC Inverter Control
- Converts AC line voltage into filtered variable DC voltage
- Provides continuous compressor operation, while adjusting the capacity according to indoor temperature
- Adjusts compressor output in increments as small as 1%
- The accurate sensing of cooling load prevents frequent changes in capacity and ensures efficient, economical operation
- Power Factor Correction (PFC) circuit monitors the DC bus for high, low and abnormal voltage conditions to protect the compressor
- Two LEDs (red and green) indicate inverter operating status and aid in troubleshooting
- Noise filter reduces unwanted electromagnetic interference (EMI)
- Integrated on the iComfort Communicating Control for 024 and 036 models,
- Separate external inverter control for 048 and 060 models
- The inverter reactor (mounted separately) adds inductance to the line between the inverter and the compressor to limit current rise and protect the compressor

iComfort® Communicating Control
- Advanced control communicates information about various operating parameters in the air conditioner to the iComfort® Communicating Thermostats to constantly maintain the highest level of comfort, performance and efficiency available
- Auto Configuration - On start-up the control automatically sends a description of the unit to the iComfort® Communicating Thermostat to automatically configure the features available
- Control also features:
  - Seven-Segment Display - Shows information about outdoor unit type and capacity and also displays alerts for common fault conditions (electrical and mechanical)
  - Low Voltage Protection - Prevents compressor operation when voltage is not within the specified range
  - High and low pressure switch monitoring with provisions for lockout
  - Five-Strike lockout protection protects compressor
  - Liquid line temperature and sensor monitoring
  - EEPROM storage of all local configurations
  - Non-volatile memory storage of 100 alarm codes with display of last 10 codes for troubleshooting
  - Built-in low-ambient control

Low Ambient Operation
- Air conditioner can operate down to 0°F outdoor air temperature

NOTE - A freezestat is recommended for extra protection during low ambient operation.

Climate IQ™ Technology
- Optimizes dehumidification settings for specific climates to improve home comfort during cooling operation
- iComfort® S30 Thermostat Setting:
  - Climate IQ (Auto) - Dry, Normal, Basic and Humid modes are automatically set based on the difference between the measured relative humidity and the relative humidity setting
  - All modes are selected on the iComfort® Communicating Thermostat

Outdoor Air Temperature Sensor
- Used with iComfort® Communicating Thermostats
- Sensor is auto-detected when connected to thermostat
REQUIRED COMPONENTS

NOTE - The XC20 Air Conditioner can only be used with an iComfort® Communicating Thermostat.

iComfort® S30 Ultra-Smart Wi-Fi Thermostat (part of the iComfort® Residential Communicating Control System)
• Recognizes and connects to all iComfort® Communicating products to automatically configure and control the heating/cooling system (based on user-specified settings) for the highest level of comfort, performance and efficiency
• Recognizes model and serial number information for iComfort® Communicating products to simplify system setup
• Wi-Fi remote temperature monitoring and adjustment through a home wireless network for desktop PCs, laptops and apps for smartphones or tablets
• Smart home automation compatible with Apple Homekit™, Amazon Alexa®, Google Assistant and IFTTT
• Service alerts and reminders sent via text message or e-mail
• Dealer Dashboard features online real-time monitoring of installed iComfort® Communicating systems
• Simple easy-to-use touchscreen allows complete system configuration
• Scheduled maintenance alerts, system warnings and troubleshooting are also displayed on thermostat screen
• Easy to read 7 inch high definition color display (measured diagonally)
• Installer setup screens allow quick and simple system configuration without a manual. Installer can also run tests on complete system or individual components for easy maintenance and troubleshooting
• Serial communications bus (RSBus), with less wiring than a conventional heating/cooling system, allows system communication
• Uses 4-wire, 18-gauge standard thermostat wiring
• High Definition Color Display, Mag-Mount, Smart Hub Controller, wallplate (for retrofit installations) furnished for easy installation

NOTE - See the iComfort® S30 Thermostat Product Specifications bulletin in the Controls section for more information.

CABINET

8• Heavy-gauge steel construction
• Pre-painted cabinet finish
• Control box is conveniently located with all controls factory wired
• Large removable panel provides service access
• Drainage holes are provided in base section for moisture removal
• High density polyethylene unit support feet raise the unit off of the mounting surface, away from damaging moisture

PermaGuard™ Unit Base
• Durable zinc-coated base section resists rust and corrosion

9SmartHinge™ Louvered Coil Protection
• Steel louvered panels provide complete coil protection
• Panels are hinged to allow easy cleaning and servicing of coils
• Panels may be completely removed
• Interlocking tabs and slots assure tight fit on cabinet

10Refrigerant Line Connections, Electrical Inlets and Service Valves
• Sweat connection suction and liquid lines
• Located on corner of unit cabinet
• Suction valve can be fully shut off, while liquid valve may be front seated to manage refrigerant charge while servicing system
• Refrigerant line connections and field wiring inlets are located in one central area of the cabinet
• See dimension drawing

### REQUIRED COMPONENTS - ORDER SEPARATELY

- **iComfort® S30 Ultra-Smart Wi-Fi Thermostat** 12U67
- **Discharge Air Temperature Sensor** 88K38
- **Freezestat** 3/8 in. tubing 93G35
- **Refrigerant Line Sets** L15-41-20 L15-41-40
- **Field Fabricate**

### OPTIONAL ACCESSORIES - ORDER SEPARATELY

- **Freezestat** 5/8 in. tubing 50A93
- **Refrigerant Line Sets** L15-41-50 L15-65-40
- **Field Fabricate**

**NOTE** - Extremes of operating range are plus 10% and minus 5% of line voltage.

1. Refrigerant charge sufficient for 15 ft. length of refrigerant lines. For longer line set requirements see the Installation Instructions for information about line set length and additional refrigerant charge required.
2. HACR type breaker or fuse.
3. Refer to National or Canadian Electrical Code manual to determine wire, fuse and disconnect size requirements.
4. Used with the iComfort® S30 Ultra-Smart Wi-Fi Thermostat for optional service diagnostics.
5. Freezestat is recommended for low ambient operation.
6. Refer to the Installation Instructions for Line Set Requirements and Refrigerant Piping Guidelines.
**INSTALLATION CLEARANCES**

**NOTES:**

- Service clearance of 30 in. (762 mm) must be maintained on one of the sides adjacent to the control box.

- Clearance to one of the other three sides must be 36 in. (914 mm).

- Clearance to one of the remaining two sides may be 12 in. (305 mm) and the final side may be 6 in. (152 mm).

- A clearance of 24 in. (610 mm) must be maintained between two units.

- 48 in. (1219 mm) clearance required on top of unit.

CX35 and CHX35 coils and all Lennox air handlers are shipped with a factory installed TXV.

C35 and CH33/CH35 coils - Replace the factory installed orifice with the expansion valve listed.

CR33 and CH23 coils - Use the expansion valve listed.

AHRI STANDARD 210/240

- Cooling or heating capacities are net values, including the effects of blower motor heat, and do not include supplementary heat. Power input is the total power input to the compressor(s) and fan(s), plus any controls and other items required as part of the system for normal operation.

- Units which do not have an indoor air-circulating blower furnished as part of the model, i.e., split system with indoor coil only, is established by subtracting from the total cooling capacity 1250 Btu/h per 1,000 cfm, and by adding the same amount to the heating capacity. Total power input for both heating and cooling is increased by 365 W per 1,000 cfm of indoor air circulated.
